Powers two tattoo machines

FOOT SWITCH ROUND

COMFORTABLE ALL AROUND

- 360° accessibility
- Easy to use
- Super robust material
- Thin, flexible cable (2 m)

SOL NOVA

POWERFUL DEVICE FOR PRECISE LINES AND GENTLE SHADES

An incredibly soft appearance, extremely quiet operation, and hardly any heat development with an extraordinarily powerful motor – all of this characterizes the Cheyenne Sol Nova.

A dream for every tattoo artist! This innovative tattoo machine provides surprising versatility and technical finesse. Due to its construction and the center of gravity at the front, the SolNova offers a perfect balance and thereby optimal handling.

- Durable and robust machine
- Perfect balance, weight shifted to the front
- 25 Hz low frequency: for dot workers and color realists
- Powerful machine, very gentle to the skin
- 3,5 mm stroke, good for lines and shades
- Easy to safety cover

POWER UNIT III

DESIGNED TO AMAZE

COMING SOON

The highly innovative Power Unit III features a contactless gesture control. A simple wipe & wave movement sets the device into motion and allows a more hygienic and easier way to work. 23 frequency levels ensure absolute precision.

The PU III can be fixated with eight integrated magnets and a removable metal plate. This way, the PU III can be positioned on different locations and fastened safely onto small metal surfaces. The integrated sensor recognizes the actual position of the PU III and rotates - just like a tablet pc- the display according to the location reliably. Two USB- Ports allow to connect further devices.

- Contactless gesture control with wiping and wave movements
- 23 frequency steps for highest precision
- Secure and flexible mounting thanks to eight magnets
- Perfect visibility of the display thanks to integrated position sensor
- Two USB ports for connecting additional devices for charging
